Securitization Mortgage Audit ("SA")

Securitization Mortgage Audit investigates the actual securitization of your loan and answers the critical questions about whether your lender has the right to foreclose on your home.

The Securitization Audit implements the Forensic Audit Servicing & Pooling Audit which tracks the alleged ownership of the mortgage and can be critical in determining whether the mortgage is sound.

Background: If a Fannie Mae Form 1003, also known as the Uniform Residential Loan Application (Form 1003) exists as part of the mortgage paperwork, the loan is considered a Federally Related Mortgage. If it is a Federally related mortgage, then it was intended to be sold into a pool of mortgages for security investment.

Advantages: If a home is in foreclosure, the bank claims to own the note and mortgage. A Securitization Audit can determine if the claimant can document that they actually hold the note in their possession.

This Program provides an Online Interactive Educational Program and Service.

Please note that a Securitization Audit must be done after a Forensic Audit has been conducted.
